EXPERIENCE

Software developer

iD3i, IT services company in Brest

2019 – present

Varied projects across sectors, and rarely the same hat: developer, project manager, technical or functional lead as needed. My speciality remains front-end and UI/UX.

AI is part of my everyday toolkit, guided by detailed specifications.

Key projects

● Sports club membership management

Product Owner, project manager and developer

Application that brings a sports club's day-to-day running into one place: member records and registrations.

● Restaurant planning

Developer

Tool for managing orders, rotas and everything else that comes with running a restaurant. A trade I know from the inside.

● Fire safety

Product Owner, project manager and developer

Application for creating pre-incident plans for firefighters, looked up by entering a site's details and exported as PDFs. Drawing tool for marking sensitive and high-risk areas on drone photos.

● Marine pollution response

Project manager and technical lead

Stock management application for pollution response equipment, so that it is ready on the day it is needed.

● id3i.fr website redesign

Developer, functional lead and AI

Complete redesign of the company's website, built on proven technologies backed by the community.

Waiter, then front-of-house manager

Restaurant trade

2008 – 2018

Ten years front of house: team management, handling the rush, customer relations. Many restaurants, each with its own way of working.

PERSONAL PROJECTS

Ramonéa ramonea.fr ↗

Vue.js 3, TypeScript and Supabase

Website for a chimney sweeping business on the Crozon peninsula: services, prices, FAQ and contact, with a full back office so the owner can manage content, photos, translations and SEO on their own.

Les ateliers de Camille camilledeboiscuilletherapeute.com ↗

Astro

Website of Camille de Boiscuillé, a psychotherapy practitioner in Crozon: her services (art therapy, EMDR, family therapy) presented on an ultra-light static site, with no JavaScript and no cookies.

SKILLS

Front-end & UI/UX

Accessibility (WCAG) · Vue.js 3 · Nuxt · Astro · TypeScript · Modern CSS · Interface design

Back-end

C# · PostgreSQL · Supabase

DevOps & tools
